Good morning,

I have checked with our leadership and we are ok to list the project. There is no issue with listing the county level location information.

Thank you for checking with us.

Caroline

**WARNING - This message is from an EXTERNAL SENDER - be CAUTIOUS, particularly with links and attachments.**

---

Good afternoon, Caroline and Caroline!

Last Thursday (8/25/22), we were notified of an Oxy press release related to the Brown Pelican project in Texas. This was followed on Friday (8/26/22) by an online news article. Both of these items listed that the project is located in Ector County, TX.

EPA headquarters currently maintains a table on EPA's Class VI webpage (found [here](#)) in which they list all projects that have completed the administrative review phase of the Class VI application process. However, since the county information for Project Brown Pelican has been redacted in all GSDT submissions, Brown Pelican has not been listed in the table on the webpage. In light of the recent press release and article, I was wondering if it would be acceptable for them to now list your project in the table? The entry for Brown Pelican would look similar to the other entries in the table (save for the Archer Daniels Midland wells in Region 5, which are the only Class VI wells with active permits currently).

If you consent to the project being listed on the webpage, would you mind replying all to this email (to include everyone listed from EPA headquarters) and indicating in a sentence or two that you consent to being listed and that there is no issue with listing the county level location information? If so, we would greatly appreciate it!

If you all still do not consent, please let us know also, and we will continue to leave it off the table until it becomes an active project.

If you have any questions, please let me know!

Thank you!

Brandon
